

Comment Functionality Fixed

Jianlin Su

January 20, 2013

I have been wondering why no one has left any comments on the blog these days. Has the quality of my articles declined? However, statistics show that the number of visitors has actually increased compared to before. I was feeling quite depressed but could not find the answer.

Today, I received an email from a reader named **4anpan**, stating that the comment unlocking function was broken. I tested it myself and found that it was indeed the case!! It turns out it wasn't necessarily that no one was commenting, but rather that the comment plugin had an issue. After troubleshooting, it was found that the latest formula plugin (ASCIIMathMLwFallback2) conflicts with the comment plugin. I am currently brainstorming a new plugin solution.

Many thanks to reader 4anpan for the feedback. I hope more readers will help improve Scientific Space. It is more exciting with you here!!

Looking forward to your voice ^__^
